

QUIZ 1

b) to string() this.code + ":" +
 this.student.length + "students"
 + this.id + this.name + " " +
 this.gpa

BLM305: 2 students
 /11234 Ali - . 3.25

c) m.get("BLM 305") => 46 data içinde 500 kurs var.
 function convertToMap();

```

let m = new Map();
for (let b of data) {
    let n = m.get(b.course.name)
    if (!n) {
        n = new Set()
        m.set(b.course.name, n)
    }
    n.add(b)
}
return

```

d) data içindeki bütün student isimleri set içinde toplar!

```

function topla {
    let s = new Set()
    for (let x of data)
        if (x.name > num) s.add(x);
    return s;
}

```

② a) $a = 345;$
integer
 $d = [a, b];$
array

$b = 'two';$
string
 $c = 'a, b';$
string
 $e = \{a, b\}$
object
