Sample code

```
async function toJSON(url) {
    let r = await fetch(url)
    if (!r.ok) error(r.statusText)
    return r.json()
}
async function readUser() {
    const BR = "<BR>",
      URL = "https://api.github.com/users/"
    let u = await toJSON(URL+usr.value)
    if (!u || !u.login)
      error(usr.value+' not found')
    //u.login is the same as usr.value
    out.style.color = ''
    out.innerHTML = ''
    //start with a tiny image
    let i = document.createElement("img")
    i.src = u.avatar_url
    out.appendChild(i)
    //add name and location
    let s = ( u.name? u.name : u.login)
    out.innerHTML += BR + s
    let l = (u.location? u.location : " ")
    loc.innerHTML = l;
    //add link to GitHub
    let h = u.login
    username.innerHTML = h
    let c = u.company
    uni.innerText = c
    //let m = u.email?u.mail:""
    //mail.innerText = m
    let b = u.blog
    blog.innerHTML = b
}
```
